

**PARLIAMENRTARY FORUM ON CLIMATE CHANGE (PFCC)**

**Proposed Activities for 2016**

## **Implementation Work Plan**

This section gives an overview on the implementation modalities of the proposed activities, which aim at taking an action oriented approach to creating awareness on climate change issues among MPs and their constituencies. The work plan is cognizant of the PFCC Strategic Plan 2013-2017, the MOU between GIZ and PFCC, the ongoing national Policy Development Processes (Paris Agreement, Nationally determined Contributions (NDCs), The Climate Change Law, United Nations Framework Convention on Climate Change (UNFCCC). Other considerations made include the newly elected 10<sup>th</sup> Parliament and the desired institutional Development Options. The implementation framework briefly covers the following important elements:

### **1. Human Resource Development**

PFCC staff shall be oriented in management of parliamentary affairs, mentorship exposure and networking. In addition, the new staff roles shall be re defined.

### **2. Creating awareness on the outcomes of COP21**

#### **Rational:**

2015 is a landmark year in the climate change arena, when world leaders are expected to come up with a binding climate change agreement, which will cause nations to cut their greenhouse gas emissions to a level, which will not allow 2<sup>0</sup>c temperature increase. International negotiators are already in Paris, but due to financial constraints, PFCC has not been able to send its members. The Programme Coordinator who will be joining this meeting will therefore keep the members up-dated on the proceedings and also submit a comprehensive report upon return with recommendations for creating awareness among the current and next Parliament. Similarly PFCC envisions adequate representation in COP 22 due to take place in Morocco.

### **3. Constituting a Board of Trustees and fulfillment of other constitutional issues**

PFCC will identify reputable and influential individuals who to serve on the Board of Trustees. The purpose of the Board of Trustees is to create a strong backstopping, which will provide technical and fundraising support to the Forum. In continuation, there is a planned exercise of enrolling Associate Members should the executive decide so.

Associate members will not be Members of Parliament, but rather individuals who support the cause for PFCC existence. Associate Members will contribute ideas towards and provide advice on the right direction for PFCC to take, but will their powers to vote shall be determined from time to time. Having Associate members will not only increase sources of income for the Forum, but will also improve awareness about the Forums activities. In addition, PFCC members shall be informed about key institutions of which their organized meetings shall be attended. Following the annual requirements, PFCC will conduct an Annual General Meeting to which the new executive will be approved.

### **4. Training Workshop, Enrolling new members and setting up of New Executive Committee**

Since the general parliament is in Transition, it is a direct implication for PFCC to have a mix of new and old members. The old members will need refresher sessions after the campaigns, and the new members will need orientation and awareness sessions before they make up their minds to join PFCC. In addition, the enrolled members shall be organized in four thematic groups; mitigation, technology Transfer, Finance and Adaptation.

#### **5. Grand Parliamentary Climate Change Awareness week and Efficient Energy Expo in Parliament**

The purpose of this activity is to create awareness among MPs and Parliament staff on the existing energy efficient technologies.

#### **6. Mobilization, Awareness creation of Constituencies on solar lamps, Fuel saving stoves use (including (TV and Radio Talk shows in Local Language)**

The purpose of this activity is to reach out to the communities with sustainable energy messages through their leaders.

#### **7. PFCC participation in other ongoing climate and renewable energy advocacy.**

There shall be adequate participation in advocacy activities related to the development of the Climate Change Law, implementation of the Paris agreement, the NDCs and the annual energy week. In doing this a number of visibility actions including the feeding of the website, development of communicative materials, supporting the dissemination of weather forecasts and budget for climate advocacy is envisaged. In addition, PFCC staff shall conduct fundraising initiatives including fact finding missions and development of concepts among others.

## Work Plan Schedule

<b>PFCC WORKPLAN 2016</b>	<b>Qtr 1</b>			<b>Qtr 2</b>			<b>Qtr 3</b>			<b>Qtr4</b>			
<b>Activity</b>							<b>2016</b>
